

Foundation (trench) blocks

Stowell Concrete have two designs of foundation block. Both types have a 300mm wide dimension which allows for a 100mm inside and 100mm outside skin of blockwork or brickwork to be built, leaving a 100mm cavity.

Wider cavities or thicker block widths can be accommodated by using the F340 foundation block laid with the 340mm dimension across the wall.

Foundation blocks are available in dense concrete 10.4 N/mm² and also Stowlite medium dense concrete 7.3 N/mm².

Foundation blocks	block size mm nominal	approx weight kg	approx oven dry density kg/m ³	number per pack
Dense	300 × 100 × 440	26 •	1975	33
Dense	300 × 100 × 340	20	1975	33
Stowlite	300 × 100 × 440	19	1450	33
Stowlite	300 × 100 × 340	15	1450	33

- Blocks in excess of 20kg – please use with caution after assessing the risks.

All products are available ex works.
Prices on application.
Telephone our sales office for further information and quotations.
