

# Hollow and cellular concrete blocks

Stowell offer two sizes of hollow and one size of cellular concrete block to complement their range of solid dense blocks. They are manufactured to BS EN 771-3 using Class 1 limestone aggregates.

The blocks are available in a standard face size of 440×215mm and in thicknesses of 140mm and 215mm in a standard finish (suitable for rendering). They are primarily used in locations that require construction using a reinforced concrete wall and in agricultural buildings.

Size mm	approx weight kg	approx concrete density kg/m <sup>3</sup>	per tonne 7.3 N/mm <sup>2</sup>	per cube /band
440 × 215 × 140	19	1950	52	96
440 × 215 × 215	28*	1950	36	60

- Blocks in excess of 20kg – please use with caution after assessing the risks.

All products are available ex works.  
 Prices on application.
