

# Vintage flagstones... traditional style decorative flags

Our Vintage Flagstones are ideal for creating that period character which is in keeping with older properties. Produced in a natural stone grey, they are suitable for any domestic application from paths or patios to driveways.

Available in a variety of sizes, as detailed below, these authentic style flagstones can be laid out in a surprising number of different traditional designs – the most common layouts are shown right and overleaf for your convenience.

With all our outdoor concrete products, we use a high cement content, tough enough to withstand even the most adverse weather conditions\*. The stone grey finish of these high quality flagstones has minor variations which help create their natural appearance.

The gap between products may vary from 3/8 inch to 1/2 inch and in our opinion look better grouted with mortar coloured with black pigment and left approximately 3/8 inch lower than the surface of the slabs. Vintage slabs are typically 1 5/8 inch thick

While every effort is made to ensure that the colours of our products do not vary, complete colour consistency cannot be guaranteed.
