

Kentledge blocks (ballast blocks)

Stowell Concrete have developed with ZND UK* a heavy-duty system to be used in conjunction with temporary fencing/hoarding.

These Kentledge blocks are designed to be moveable by both forklifts and lorry-mounted cranes and are manufactured using semi-dry 7.3N/mm² 2000 kg/m³ oven-dry density concrete.

The Stowell 'Big Foot' Kentledge block has been designed to be used with ZND UK's temporary fencing systems. ZND UK has developed a range of components that, when used with Big Foot Blocks, will stabilise mesh and solid board temporary fences.

Kentledge	ZND UK name	approx weight kg	no. per tonne
Full unit	Big Foot 780	780	1.3
Half unit	Big Foot 390	390	2.6

* ZND UK is one of the UK's largest manufacturers of temporary fencing systems and they can provide a wide variety of accessories that can be used with Stowell Concrete Fence Feet and Big Foot Kentledge Blocks. For further technical or purchasing information please contact ZND UK on tel: 01709 521100 fax: 01709 521111 or visit their web site: www.znduk.com

Check out what wind speeds different panels and stabilisation systems can resist before they reach their 'limit of stability' and become unstable.
